

# SoloRider Single Rider Golf Car

## *Guidelines for Use*

---

**We are pleased to have received a donation of a single rider golf car through the USGA's Employee Giving Program!**

**This adaptive golf car allows an individual with a disability the opportunity to access the golf course and assist while playing the game. The SoloRider golf car is equipped with hand controls and a patented 350-degree, hydraulic swivel seat that elevates a player to a standing position for play.**

### How to reserve the single rider car for use:

- When making your tee time reservation, note that you are requesting use of the SoloRider car for either yourself or a member of your group.
- Members may make a tee time and car reservation up to 7 days in advance.
- We suggest a minimum of 24 hours advance notice to reserve the car. However, same day or walk in requests will be accepted as long as the car is available for a minimum of 2.5 hours prior to the next reservation.
- Please arrive 15 minutes prior to your tee time for car orientation.

### Upon Arrival:

- Check in at the starter building as per usual and sign in.
- A staff member will walk you through an orientation on proper use of the car and ask you to perform a test drive to ensure safe operation.

### During Use:

- The course ranger will observe car use throughout their regular monitoring of the course. If you need assistance, please let them know.
- The car is designed to be used on all areas of the golf course from tee to green. We ask that it not be driven in the deep rough.
- Staff reserves the right to prohibit use if improper operation or unsafe behavior is observed.

### Restriction on Use due to Course Conditions:

- Staff reserves the right to restrict the use of the car during wet course conditions when use may result in damage to the course.
