2024 Residential Property Square Footage and Assessment Data

Disclaimer:

The report which follows includes square footage* and other assessment information for all residential properties in Bernards Township. The information contained was compiled as of the date listed at the top right corner of the report and may not include all closed sales as of that date. Bernards Township does not guarantee the accuracy or completeness of this report. Please note that nominal sales (less than \$100) represent transfers of title and are not considered in the assessment process.

* The square footage listed may not reflect recent additions and/or alterations. Please contact our office to verify square footage if any such work has been recently completed.

About the Bernards Township Annual Reassessment Program:

The Mission of the Office of Assessment is to maintain a fair and equitable tax base for the community based on sound assessment practices, treating all property types and owners impartially. The Assessor is responsible for identifying and placing a value on every parcel of land within the confines of the Township's borders. The values are derived through the formulation of models developed from closed comparable sales and uniformly applied to comparable housing styles for design, quality, and location. These values are reviewed and updated on an annual basis. All assessments are based on market trends by neighborhood, style, size, and amenities as of October 1, of the pretax year. Assessed values for residential properties closely reflect 100% of market value.

Being an annually reassessed district requires all properties be inspected every five years. As such, approximately twenty percent of the Township is inspected each year. Inspections allow for a more accurate database and therefore, more fair and accurate assessments. Inspection results will be reflected in the following year's assessment. Properties not physically inspected will be estimated based on typical attributes of comparable housing. Annual reassessing and the inspection process contribute to more equitable and uniform assessments throughout the Township, which results in more fair and equitable taxes.

If you have any questions regarding this report or the Annual Reassessment Program, please feel free to contact our office.

PLEASE NOTE: The information listed under "**Rooms**" represents the following (ex. 9 / 15): 9 rooms above grade (1st, 2nd, 3rd floors), not including bathrooms
15 total rooms, bathrooms and basement rooms included
