LANDSCAPING OPTIONS

Lawns

• Most grasses are not naturally designed for local soil type
• Require heavy watering
• Expensive and Time Consuming to maintain
• Increase NPS Pollution with fertilizers and pesticides
• Increase fossil fuel use and airborne emissions from mowing
• Decrease biodiversity

Native Landscaping

• Choose plants naturally designed for landscape
• Xeriscaping (reduced water use)
• Less maintenance
• Less fertilizer
• Increase tree cover
• Increase plant and animal diversity
• Increase pervious cover
