

SIGN UP FOR THE SDL PORTAL TO ACCESS PERMIT RECORDS

In order to better serve Construction Code customers Bernards Township has opened a public internet portal that allows access to construction permit records and application status. In June of 2015 the Township Construction Code office integrated with Spatial Data Logic (SDL) of Somerset, NJ for Construction Permit software. Spatial Data Logic offers municipal software solutions to a number of municipalities throughout New Jersey.

One of the many features SDL offers is the ability for public internet access to construction permit records and application status. Bernards Township is now offering this service. By utilizing this free service, members of the public can search construction permit records and application status on their own from any internet capable device.

A free user account is required. User accounts can be created by visiting www.sdlportal.com users can create an account and start using the service. With the same user account, you can switch towns and search records in other participating municipalities such as Chatham Borough, Florham Park, Milburn and Warren Township to name a few. This could be of particular assistance to Real Estate professionals and Contractors.

Dennis Bettler, Construction Official says "The information available on the portal is the same information that the Township has been providing over the counter and via email when requested. No personal or private information is viewable from the portal."

Please visit www.sdlportal.com today to take advantage of this valuable research tool.
